Vulnerability in Sentinel LDK License Manager when installed as Service

Description

An attacker can potentially send tampered packets to the LDK License Manager (when installed as a service) resulting a crash while parsing this packet causing a denial of service.

Products Affected

Sentinel LDK Runtime Versions lower than 7.103.

Mitigation

Users are advised to address this vulnerability as soon as possible by taking action to upgrade to version 7.103 or later found at the following link:

<https://sentinelcustomer.gemalto.com/sentineldownloads/>

Gemalto acknowledges and thanks Vladimir Dashchenko from Kaspersky Lab ICS CERT for responsible disclosure of these vulnerabilities.
