ANNOUNCEMENT

2024 DSATools™ User Group Meeting

Powertech is pleased to announce the 2024 DSATools™ user group meeting. This annual event provides a forum for Powertech and the DSATools™ users to discuss and exchange ideas for the development and applications of DSATools™ software. We will give an overview of Powertech's latest software products, demonstrate their applications, and report on new and up-coming developments. There will be presentations made by our users on their applications and experiences in using DSATools™.

This year's User Group Meeting will be hosted at the **California ISO Folsom Campus**.

After the user group meeting, there will be a tour to visit the California ISO control center. During the visit, California ISO will describe the reliability requirements for operation of the California ISO power system and the application of an On-Line Dynamic Security Assessment system using DSATools™.

If you wish to share your experience in applying DSATools™ by making a presentation at the user group meeting, please contact us (dsainfo@powertechlabs.com).

When:
- Thursday October 17 and Friday October 18 (morning), 2024 for the user group meeting
- Friday October 18, 2024 (1:30 PM to 3:30 PM) for the tour

Where: California ISO Folsom campus, 250 Outcropping Way, Folsom, California, 95630, USA

Who: Open to everyone including existing DSATools™ users as well as those interested in advanced software for system planning and operation studies

Cost: Free! You will be responsible for your transportation and hotel expenses

Accommodations: We will send you a list of hotels with California ISO rates after receiving your registration.

Please RSVP at https://www.dsatools.com/2024-dsatools-user-group-meeting/ by August 15th, 2024. Note that the number of people allowed to the California ISO meeting room is limited, so please RSVP at your earliest convenience. The attendees will be subject to security clearance by California ISO. As the process of registering non-US visitors to the California ISO facility can take up to 45 days, we do need to send the information to California ISO by mid-August.

For more information – Please check our website at https://www.dsatools.com/ (under News | Events) for details of this event, registration, and hotel accommodation information. If you have any questions, please email dsainfo@powertechlabs.com.

We look forward to seeing you in Folsom, USA!
